

# Coconuts & Onions

## Coconut:

Coconut is highly nutritious and rich in Fibre, Vitamins and minerals. It is classified as a “functional food “ because it provides many health benefits beyond its nutritional content. In traditional medicine around the world coconut is used to treat a wide variety of health problems including the following: abscesses, asthma, baldness, bronchitis, bruises, burns, colds, constipation, cough, dropsy, dysentery, earache, fever, flu, gingivitis, gonorrhoea, irregular or painful menstruation, jaundice, kidney stones, lice, malnutrition, nausea, rash, scabies, scurvy, skin infections, sore throat, swelling, syphilis, toothache, tuberculosis, tumours, typhoid, ulcers, upset stomach, weakness and wounds. Our semi-husked Indian coconuts are well accepted in various International Markets.

## Onion:

India stands 2nd position in Onion production after China in the World. Onions in general are good for us, but red onions have a higher concentration of flavonoids in the outer layers, which, according to a Cornell study, can help reduce the risk of cancer, heart disease, and diabetes. Red onions also contain the brain-boosting flavonol quercetin, which helps keep memory in tip-top shape.

# Coconuts & Onions

## Semi husked coconut

### Specification:

Colour	: light brown
